WAKOL Sealing Compounds for Beverage Packaging – Highest standards for your success

WAKOL D 3756 Sealing Compound – our tailor-made sealant choice for beverage can lining. Developed to fulfil highest quality standards, WAKOL D 3756 Sealing Compound incorporates all the knowledge and experience from decades of Wakol's continuous innovation process in sealant development. Its formulation is fine-tuned for highest performance in state-of-the-art lining and filling operations

- Excellent process stability, even at highest line speeds (>2000 epm)
- Reduced scrap rates, saving material & money
- Ready for demanding, highest throughput filling & closing systems
- Robust against fluctuating process temperatures
- Can be used for 2- and 3-piece cans, tinsplate and aluminum ends
- Water based, solvent free, BPA free
- Suitable for a wide range of drinks (beer, carbonated soft drinks, fruit juices, energy drinks, water, coffee and alcoholic drinks) including pasteurization and retortability

This convincing range of features has earned our product a wide range of regional and multi-national filler approvals. Change over to WAKOL D 3756 Sealing Compound therefore is as close as it gets to a hassle-free drop-in solution. For beverage can makers under pressure from challenges of tightening supply chain, this excellent option means one less thing to worry about.
